
CLINICAL IMAGING

VOLUME 34, NUMBER 5, 2010

Contents

ORIGINAL ARTICLES

- 327 Cerebral Pulsatility Index by Transcranial Doppler Sonography Predicts the Prognosis of Patients With Fulminant Hepatic Failure**
Manri Kawakami, Masahiko Koda, and Yoshikazu Murawaki
- 332 High Signal Intensity in the Dural Sinuses on 3D-TOF MR Angiography at 3.0 T**
Sachiko Inano, Daisuke Itoh, Hidemasa Takao, Naoto Hayashi, Harushi Mori, Akira Kunimatsu, Osamu Abe, Shigeki Aoki, and Kuni Ohtomo
- 337 Anomalous Origin of the Coronary Arteries in Children: Diagnostic Role of Three-Dimensional Coronary MR Angiography**
Alberto Clemente, Mario Del Borrello, Pietro Greco, Paolo Mannella, Franco Di Gregorio, Silvia Romano, and Aldo Morra
- 344 Radiological Features of Acute Gastric Volvulus in Adult Patients**
Hassan Al-Balas, Mohammed Bani Hani, and Hamzi Z. Omari
- 348 Impact of Age on FDG Uptake in the Liver on PET Scan**
Chun-Yi Lin, Hueisch-Jy Ding, Cheng-Chieh Lin, Cheng-Chieh Chen, Shung-Shung Sun, and Chia-Hung Kao
- 351 Characterization of Pancreatic Metastases From Primary Lung Cancer Using Magnetic Resonance Imaging**
Sun Xi-wen and Chen Shu-zhen
- 355 Flow Turbulence or Twinkling Artifact? A Primary Observation on the Intrarenal Color Doppler Sonography**
Jing Gao, Amelia Ng, Minh-Nhut Y. Dang, and Robert Min
- 361 Detection of Lymph Nodes in Pelvic Malignancies With Computed Tomography and Magnetic Resonance Imaging**
Anuradha Saokar, Tina Islam, Marion Jantsch, Mansi A. Saksena, Peter F. Hahn, and Mukesh G. Harisinghani
- 367 Graph-Matching-Based Computed Tomography Angiography in Peripheral Arterial Occlusive Disease**
Carolin Brockmann, Susanne Jochum, Jürgen Hesser, Dzmitry Maksimov, Andreas Schnitzer, Christel Weiss, Patricius Diezler, Stefan O. Schoenberg, and Steffen Diehl
- 375 Dynamic Close-Mouth View Radiograph Method for the Diagnosis of Lateral Dynamic Instability of the Atlantoaxial Joint**
Susumu Fujiwara, Daisaku Tokunaga, Ryo Oda, Shogo Toyama, Kan Imai, Atushi Doi, and Toshikazu Kubo

Contents continued

CASE REPORTS

- 379 An Unusual Case of Primary Mesenchymal Chondrosarcoma in Orbit With Intracranial Extension**
Mingming Liu, Wei Qin, and Zhengqin Yin
- 382 Melanotic Neuroectodermal Tumor of Infancy: Report of One Calvarial Lesion With T1 Shortening and One Maxillary Lesion**
Korgun Koral, Betul Derinkuyu, Charles Timmons,
Carina L. Schwartz-Dabney, and Dale Swift
- 385 Use of a Hemostasis Introducer Sheath to Guide Clip Delivery During Stereotactic Directional Vacuum-Assisted Breast Biopsy When the Biopsy System Malfunctions**
Jane Wang and Chun-Ju Chang
- 388 Kikuchi–Fujimoto Disease With Spontaneous Subdural Hematoma in a Middle-Aged Hispanic Male**
Andrew Mark Allmendinger, Vadim Spektor, Michael Sadler,
William Harrington, and Victor McLaughlin
- 393 False Positive for Malignancy of a Lung Nodule on FDG PET/CT Scans—A Lesion With High FDG Uptake But Stable in Size**
David Q. Wan, Alan D. Xu, and Charles E. Manner Jr.
- 396 Ground-Glass Nodules Found in Two Patients With Malignant Melanomas: Different Growth Rate and Different Histology**
Mi-Jin Kang, Min A. Kim, Chang Min Park, Chang-Hyun Lee, Jin Mo Goo,
and Hyun Ju Lee
- 400 Radiologic Findings of Lung Lobe Torsion in Reconstructed Multidetector Computed Tomography Image Lead to Early Detection**
Sang-Hoon Chung, Ji Eun Nam, Kyu Ok Choe, Byoung Wook Choi,
Jin Hur, Hye-Jeong Lee, and Hua Sun Kim

BOOK REVIEWS

- 404 Pediatric Imaging. The Fundamentals**
Krishna Juluru
- 404 MR Imaging of the Body**
Lawrence H. Schwartz
- 405 Musculoskeletal Radiology—RAD Cases**
Jean Noël Bruneton
- 405 Thoracic Imaging—Direct Diagnosis in Radiology**
Antonio F. Govoni
- 405 Atlas of Sectional Anatomy—The Musculoskeletal System**
Antonio F. Govoni
- 406 Interventional Radiology in Women’s Health**
Aldo Morra
- 406 Review of Radiologic Physics**
Antonio F. Govoni
- 408 Meeting and Courses**

Cover photo: A 55-year-old man with high signal intensity in the left inferior petrosal sinus and left sigmoid sinus. MR angiographic source image shows high signal intensity in the left inferior petrosal sinus (arrows) and the left sigmoid sinus (arrowheads). From “High signal intensity in the dural sinuses on 3D-TOF MR angiography at 3.0 T” by S. Inano, D. Itoh, H. Takao, N. Hayashi, H. Mori, A. Kunimatsu, O. Abe, S. Aoki, K. Ohtomo on pages 332-336 in this issue.
