
CLINICAL IMAGING

VOLUME 35, NUMBER 2, 2011

Contents

ORIGINAL CONTRIBUTIONS

- 85** **Does Direct MR Galactography have the Potential to Become an Alternative Diagnostic Tool in Patients With Pathological Nipple Discharge?**
Evelyn Wenkel, Rolf Janka, Michael Uder, Michael Doellinger, Katja Melzer, Rüdiger Schulz-Wendtland, and Siegfried A. Schwab
- 94** **Do All Mucocele-Like Lesions of the Breast Require Surgery?**
Selin Carkaci, Deanna L. Lane, Michael Z. Gilcrease, David Conrow, Mary R. Schwartz, Phan Huynh, and Wei Tse Yang
- 102** **Giant Phyllodes Tumors of the Breast: Imaging Findings With Clinicopathological Correlation in 14 Cases**
Jin Chung, Eun Ju Son, Jeong-Ah Kim, Eun-Kyung Kim, Jin Young Kwak, and Joon Jeong
- 108** **Imaging Features of Bilateral Breast Abnormalities**
Sung Bin Park, Ae Kyung Jeong, Jong Hwa Lee, Mi Hye Paeng, Kyung-Sang Lee, Byung Jae Cho, and Hak Hee Kim
- 116** **CT- and Computer-Based Features of Small Hamartomas**
Yao Huang, Dong ming Xu, Artit Jirapatnakul, Anthony P. Reeves, Ali Farooqi, Li Juan Zhang, Salvatore Giunta, Javier Zulueta, Ralph Aye, Albert Miller, David S. Mendelson, Cheryl Aylesworth, Barry Sheppard, Karl Klingler, David F. Yankelevitz, and Claudia I. Henschke
- 123** **Pulmonary Nodules: A Quantitative Method of Diagnosis by Evaluating Nodule Perimeter Difference to Approximate Oval Using Three-Dimensional CT Images**
Hisashi Kamiya, Sadayuki Murayama, Yasumasa Kakinohana, and Tetsuhiro Miyara
- 127** **Radiological Assessment of Mesenteric and Retroperitoneal Cysts in Adults: Is There a Role for Chemical Shift MRI?**
Anoop P. Ayyappan, Kartik S. Jhaveri, and Masoom A. Haider
- 133** **Contrast Behavior of High-Spatial-Resolution T1-Weighted MR Imaging at 3.0 T Vs. 1.5 T**
Hiroyoshi Isoda, Shigeki Arizono, Kotaro Shimada, Yuusuke Hirokawa, Yoji S. Maetani, Masako Kataoka, Yuji Nakamoto, Toshiya Shibata, and Kaori Togashi
- 139** **F-18 FDG PET/CT Findings in Postradiation Pelvic Insufficiency Fracture**
Ali Salavati, Vinil Shah, Zhen J. Wang, Benjamin M. Yeh, Nick G. Costouros, and Fergus V. Coakley

Contents continued

143 Sonography in the 29th Olympic and Paralympic Games: A Retrospective Analysis

Wen He, Dong-ying Xiang, and Jian-ping Dai

CASE REPORTS

148 Imaging of Partial Right Double Vena Cava With Ureter Crossing Through Its Split, Confirmed at Surgery

Jingshan Gong, Hongtao Jiang, Te Liu, Qian Yuan, Liming Sun, Jianggen Yang, and Jianmin Xu

151 Mucinous Colloid Adenocarcinoma of the Lung With Lymph Node Metastasis Showing Numerous Punctate Calcifications

Taro Murai, Masaki Hara, Yoshiyuki Ozawa, Yuta Shibamoto, Shigeki Shimizu, and Motoki Yano

156 Unusual Diffuse Pulmonary Amyloidosis in Systemic Lupus Erythematosus: Computed Tomography Findings

Sung Shine Shim, Eun Mi Chun, and Sun Hee Sung

160 Traumatic Trapped Penis: Ultrasonography and CT Findings

Hsin-Kai Wang, Yi-Hong Chou, Yen-Hua Chang, Hong-Jen Chiou, Yi-Chen Lai, and Cheng-Yen Chang

BOOK REVIEWS

163 Cranial Nerves: Anatomy, Pathology, Imaging

Maja Ukmar

163 Musculoskeletal Ultrasound with MRI Correlations

Jean Noël Bruneton

164 Musculoskeletal — The Teaching Files

Antonio F. Govoni

164 Handbook of Interventional Radiologic Procedures

Antonio F. Govoni

Cover photo: A 72-year-old woman with bilateral synchronous primary breast cancer. Both mediolateral oblique (MLO) views show bilateral high density masses (arrows) with suspicious malignant findings. Pathologic results indicated bilateral invasive ductal carcinomas. From “Imaging features of bilateral breast abnormalities” by Sung Bin Park, Ae Kyung Jeong, Jong Hwa Lee, Mi Hye Paeng, Kyung-Sang Lee, Byung Jae Cho, and Hak Hee Kim on pages 108–115 in this issue.
